GLOBAL PRODUCT CERTIFICATIONS

Bring your products to the global market

Our global product certifications service will help bring your products to the market as quickly and effectively as possible.

Features & Benefits

- Take the complexity out of the product certification process
- Global market access to over 150 countries
- Professional management of the certification process backed by 35+ years of experience in global product certifications
- Scope of project management based entirely on your needs
- Translation service of information into local country language is included
- All the forms required by each regulator or certified body provided ahead of time
- Clear and concise list of all needed documentation is identified up-front
 - Including items such as safety, EMC, RF test reports, CIG 023, data sheets, power of attorney, EU DoC, FCC Grant, block diagram, etc.
- No 'extraneous or non-value added information or forms' – only what is required by the country
- Weekly communication of project status and updates
- Original certificates delivered as allowed by the country
- Lifetime tracking and notification of certificate expiration
- Multiple country certifications can be executed simultaneously
- Local agent country service is available

Mapping out the road to compliance helps ensure that your project stays on time and within budget.
