# COMPLIANCE ROAD MAPS

## Mapping the way for product compliance

A country specific approach that guides you from the start to finish.

### Features & Benefits

- Complete visibility to all product regulatory requirements in an easy to read format
- Adaptable to any country in the world
- Shows the regulations by description, issue date, web link, high level scope, regulator name and contact
- Includes requirements, such as EMC, EMI, Safety, RF, Product Environmental, Batteries, Packaging, Product Marking, Energy Efficiency, AC Plug Style, User Manual Content, Original Artwork and more
- Applicable to any commodities from the consumer, commercial and or medical industries
- Fast delivery of normally 1-2 weeks for the initial country
- Weekly updates on road map development
- Easy to sort into different views
- Quickly identifies the 'lowest common denominator' regulatory requirements
- Adds commentary to clarify specific regulations or interactions with others
- Flexible to include different portions of a product, such as transceiver, charger, battery, etc. all in the same road map and what regulations apply to each
- Customizable to your specific requirements, country, product, or research

With over 30 years of experience in the field of regulatory compliance, our experts will take you across the finish line, every time.
